MONTHLY ENERGY REPORT

September 2023

ENERGY CONSUMPTION SUMMARY REPORT

Electric Usage Summary:

- Usage is down more than 10% at this facility:
 - a. 600 Summer (-14.70%)
 - Much larger decrease for monthly and annually.
 - Data like this often suggests a decrease in occupancy or use.

Gas Usage Summary:

- Expected to have a series of decrease in gas usage at these facilities as we move into the heating months:
 - a. 600 Summer (-70.89%)
 - b. WARE (-35.00%)

Overall Summary:

- Efficiency programs have definitely made an impact across NEIP's portfolio and we are seeing consumption numbers trending in the right direction.

Cost Summary:

- NEIP weathered the storm of higher electric rates from January to June of 2023. Overall the finances seem to be pretty good with a few exceptions and we would be happy to discuss.
